DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 9 is rejected under 35 U.S.C. 101 because it is a mixed class claim. The claim is directed to a machine but the body of the claim is directed to a method (i.e. the process of taking out the temporarily stored bank notes).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-3, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Further, regarding claims 1 and 4, the section describing the "advancement position" is unclear. Applicant claims, "at least one stopper that can advance and retreat between an advancement position at which the tip end in the taking in direction of the sheets or the like,

Art Unit: 3653

advancing from upward between the tip end regulating wall and the rear end regulating wall and being taken in ..." This language is unclear.

Regarding claims 5, the term "close to" in claim 5 is a relative term which renders the claim indefinite. The term "close to" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Regarding claims 6, the term "greatly retreated from" in claim 6 is a relative term which renders the claim indefinite. The term "greatly retreated from" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
